### Materiale supplementare

**Tab. S1** - Elenco delle specie censite (ordinate secondo il dendrogramma di Fig. 3). Nelle colonne I, II, III, IV e V sono riportati i rispettivi codici numerici delle categorie degli attributi (vedi Tab. 2) che identificano la caratteristica biologica delle singole specie. Nelle colonne a seguire è riportato, dove la specie è presente, la densità di attività media annua (DAa). Nel rigo più in basso è riportata la densità di attività totale annua (DAat), che corrisponde grossolanamente alla biomassa dei carabidi complessivamente presenti.
